ABOUT AI

Artificial Intelligence A trading refers to computer software which analyses market data and informs trading strategies. AI tools have unlocked potential new opportunities thanks to the unmatched speed at which they process vast quantities of information, supporting real-time buy and sell decisions.

This type of trading uses computer speed and computational resources compared to human traders. AI trading is gaining traction with both retail and institutional traders. Studies have shown that by 2026, approximately 60% of trading in the forex market will be performed by trading AI instead of human.

ABOUT CRYPTO

- Cryptocurrency is a form of digital currency secured by cryptography, making it nearly impossible to counterfeit or double-spend. Unlike traditional money, it is not controlled by any central government or bank. Instead, it is operated through a decentralized system known as blockchain technology

www.sparkcoin.uk

ABOUT ICO

An Initial Coin Offering (ICO) is an exciting fundraising mechanism that enables innovative startups to raise capital by issuing digital tokens. In an ICO, investors can purchase these tokens, often using established cryptocurrencies like Bitcoin or Ethereum, with the potential for appreciation as the project flourishes. ICOs empower companies to bypass traditional funding channels, attracting a diverse, global audience.

While due diligence is essential, ICOs offer a unique opportunity for investors to support groundbreaking projects and be part of the evolving digital economy, contributing to the future of technology and finance
